Conveyor Speed Chart

This chart helps you easily calculate cars per hour (CPH) in relation to the distance a conveyor roller moves in a 15 second interval.

Need to adjust your conveyor speed:

0
Seconds

15
Seconds

5' = 60 CPH

7'6" = 90 CPH

10' = 120 CPH

12'6" = 150 CPH

15' = 180 CPH

Distances shown are for the travel of 1 conveyor roller in 15 seconds.

CPH = Cars Per Hour
