Sonny's Tunnel Controller

Easily monitor all your tunnel equipment functions on-site or off-site.

Cloud-Based

Manage all of your tunnel locations from one simple interface on any device with RouterLINK.
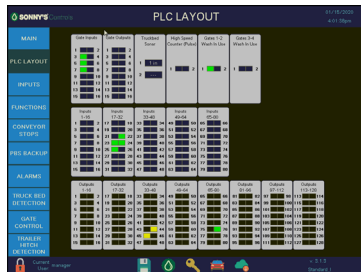

Configurable

Configure up to 170 functions and 64 inputs. Program anything from mirror bumps, to lights turning on, to scheduling the activation of irrigation systems.

Reliable

Sonny's Tunnel Controller utilizes top-of-the-line hardware from leading PLC and industrial automation manufacturers to ensure optimal reliability, accuracy, and uptime for harsh environment operation. Featuring a 32" x 74" compact footprint houses a 12" display to toggle relays and monitor your tunnel.
