

Over-Under Conveyor

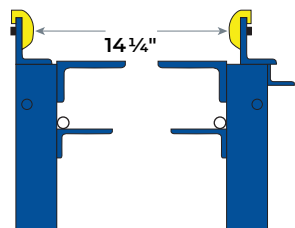

Sonny's Over-Under Conveyor is the best-selling car wash conveyor in the world for good reason. Constantly improved and refined by car wash operators for car wash operators, this reliable workhorse features a full 1/2in top deck with solid angle steel H-frame. The trusted design provides a long life and years of trouble-free service.

Features

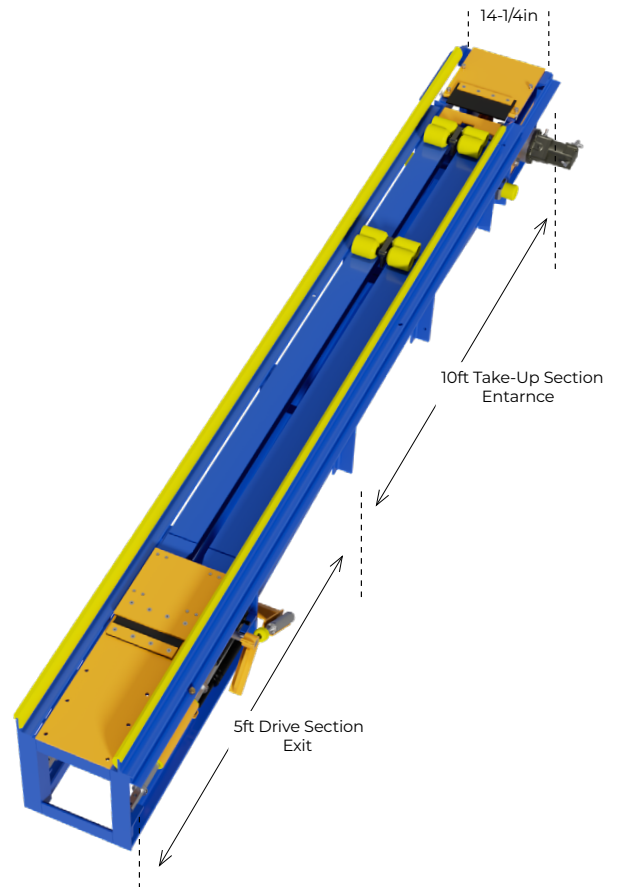

- Banana Peel rails with 14-1/4in deck that safely conveys the lowest-profile tires, widest rims, and all wheel drives with ease.
- Soft-Drop (exit) and Long-Slide take-up (entrance) reduce maintenance with unparalleled reliability.
- Works with your choice of SC78, all 88 series chains, X458 and our ultra-durable Log chain.

Specifications

SECTION	
Total Height	24in
Shoulder Height	3.5in
Tire Clearance	14-1/4in
Top Deck	3in x 5in x 1/2in Angle
Center Deck	3in x 4in x 3/8in Angle
Bottom Deck	3in x 4in x 3/8in Angle
Banana Peel Rail	Inside 2-1/2in
	Full 3-5/8in

- 1** Long-Slide Entrance Section features a front plate that eliminates bumps and rolls ahead with a longer take-up slide that increases travel for longer intervals between chain maintenance.
- 2** Wide top deck accommodates oversized tires in your wash. Custom widths available.
- 3** Soft-Drop Exit Section this trap door eliminates traditional door noise, lasts longer with less maintenance and provides a smoother, customer-friendly transition off the conveyor. A revolutionary mechanical coupler eliminates the need for maintenance and delivers reliable performance car after car.
- 4** Heavy-Duty double roller bearing with easy access grease fittings.

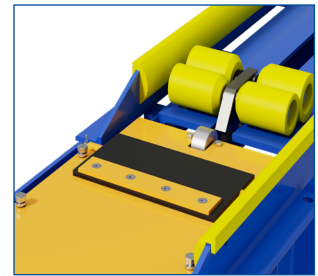

H-frame angle reinforcements every 4ft in a 15ft section for greater durability.

Air take-up for reliable performance and consistent tension for longer chain life.

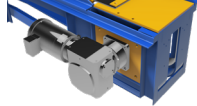

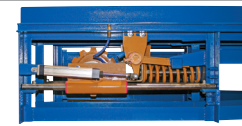

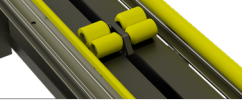

Banana Peel Rails for safer tracking while allowing for lower vehicles commonly seen today.

5/16in steel roller-up door with heavy-duty rubber hinge.

Conveyor Configuration Options

STEP 1: CHOOSE YOUR DRIVE		Hydraulic Drive: Simple, safe, and durable choice for wet environment applications.	OR		Electric Drive: Reduces utility consumption and eliminates the potential for hydraulic leaks.
STEP 2: CHOOSE YOUR TAKE-UP		Air Take-Up: Automatically adjusts to keep proper tension and easily releases for maintenance.	OR		Spring Take-Up: Long time industry standard for durability and reliability.
STEP 3: CHOOSE YOUR FINISH		Painted Conveyor: Standard painted surface delivers corrosion resistance at an affordable Price.	OR		Galvanized Conveyor: Optional surface coating can add years of life to your conveyor frame.
STEP 4: CHOOSE YOUR CHAIN	 <ul style="list-style-type: none"> Log Chain • Most durable • Easiest to remove links 	 <ul style="list-style-type: none"> SC78 • Industry standard • Compatible with older D88K Chain Sprocket Configuration • Preferred for front wheel applications 	 <ul style="list-style-type: none"> X458 • Remove links without tools
