Buff-n-Dry™ with Entrance Wraps & Tire Seal™ Machine

With Entrance Wraps, Top Mammoth™ Dryer, & Tire Seal™ Machine

- Low headroom installation with two drying materials available to meet the specific environmental requirements of every wash. Available Wraps feature a unique header design that provides further reach across the back of the vehicle while allowing for a complete retract to help material dry in-between vehicles.
- Automatic Truck Bed Retract option uses sonar to detect open truck beds and retract top brush and blowers to ensure labor-free reliable performance.
- Interchangeable material shams Velcro to the hub let you change from one set to the other every couple of months to ensure consistent wash quality, or nightly for maximum performance at a high-volume location. One set is working, while the next set is washed, dried, and waiting to work.

Buff-n-Dry™ Material Options

DRYTEX®

Perfect material for polishing and a longer lasting shine.

Proven Wick-A-Way™ material in our quietest, safest, and most effective configuration yet. Each Wick-A-Way sham Velcros to both sides of the lighter hub to eliminate slapping while increasing surface area for improved drying and safer operation. Brush density tapers at each end to wick residual micro-beads of water away from the vehicle surface while shedding moisture faster for consistent operation all day long.
