

Sonny's Air Operated Dispensing Tanks

Chemical dispensing tanks powered by Hydrominder that can be customized to meet your needs.

About Sonny's Air Operated Dispensing Tanks

Sonny's Air Operated Chemical Dispensing Tanks dispense chemistry using a simple and reliable air-driven pump. When the solution level drops in the reservoir, a float valve activates the pump and the Hydrominder siphons liquid chemical through a metering tip to maintain a constant level of ready-to-use solution. Self-contained and self-controlled, you can add a single tank for any additional applications in your wash.

Sonny's can build custom dispensing tanks specific to your needs and ship pre-plumbed and pre-wired with floor stands for simpler installation. Each application requires a separate pump station.

- Ideal for bug prep, prep guns, and additional full-wash applications
- Great for automatic or self-serve
- Sonny's Chemical Dispenser Tanks feature a universal pump mount that allows you to use our industry standard Flojet G57 or new Shurflo pumps for exceptionally long life and consistent flow

**GREAT FOR BUG PREP
AND PREP GUNS**

Pre-Plumbed, Pre-Wired Tanking Solutions

Save hours of labor, and thousands of dollars in plumbing and electrical costs.

All components used are off-the-shelf for ease of maintenance and repairs.

18in W x 14in D x 30in H

11in W x 14in D x 30in H

Choosing the Right Pump and Seals

Santoprene seals are compatible with most alkaline based products, whereas Viton seals are required for all acid based products used in the wash process.

FLOJET

Pumps (Qty) Type	Tanks (Qty) Capacity	Seal	Activation	Regulator	Hydrominder	Flojet G57 Pump Price
