- Vacuum Post Systems

## SONNY'S Vacuum System Canopies

SONNY'S Vacuum Canopy is the perfect solution to all your vacuuming needs. It's simple design allows for easy installation and maintenance. Customers will have easy access to your vacuum stations and will be sheltered from harsh elements. The boom design keeps hoses securely off the ground providing better access to both sides of the vehicle and reducing wear and tear.

### Simple Design For Easy Installation and Maintenance

**1** Slotted holes on top beam design, allow angles to be adjusted for different configurations.

**2** Vacuum hose easily attaches and detaches to booms using inlet vacuum with hose to valve adapter

**3** The holster mounted to the post provides an air tight connection, reducing energy consumption and eliminating unnecessary air draw. This allows the crevice claw to always be "at the ready" for the customer.

**4** Canopies quickly attach and detach for ease of installation and maintenance.

## SONNY'S VAC2100 Vacuum Boom System

SONNY'S VAC2100 Vacuum boom system prevents the vacuum hose from being dropped onto the ground or having to be dragged over or through a vehicle to get to the other side – extending hose and nozzle life and ensuring stations are ready to satisfy customers.

## SONNY'S VAC1100 Vacuum Post System

SONNY'S VAC1100 Vacuum Post System keeps everything organized. Our Cyclone (POU) Point-of-Use Separator and waste receptacle easily mounts to the post and the available boom attachments make it easy for users to finish fast, so the next satisfied customer can take their place.
