

Digital Queue

Sonny's Digital Queue provides attendants the peace of mind knowing which vehicle to expect next, ensuring everyone receives the wash they purchased. A camera at the Pay Station lanes takes a picture of the front of the customer vehicles and displays necessary information on screen for your attendant to accurately manage a queue.

Speed and Accuracy of Service

Attendants receive a colored image of vehicles in queue to identify if they are loading the correct vehicle onto the conveyor. Attendants can easily drag-and-drop to reorder the queue, send rollers, start/stop the conveyor, delete vehicles, and apply retracts before and after clearing the photo-eyes.

Customer Service

Provide a personalized experience by greeting customers by name, acknowledging members, first-time visitors and welcome new club members. Instantly streamline activity directly from the Digital Queue to monitor traffic and view customer activity.

Tunnel Vision

If a vehicle with a trailer hitch or damaged bumper gets through without an attendant noticing prior to entering the tunnel, there's nothing to worry about, simply retract the necessary equipment before it reaches them.

Digital Queue: Speed and Accuracy of Service

1 Customer purchases a service at Pay Station.

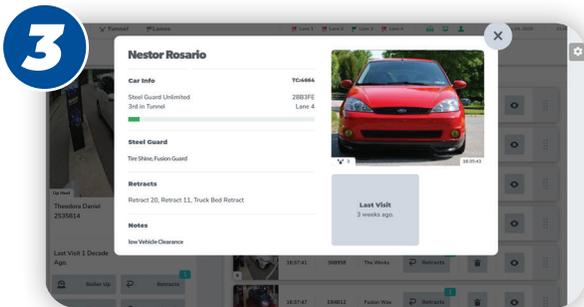

4 Attendants can acknowledge members or first-time visitors and greet customers by name.

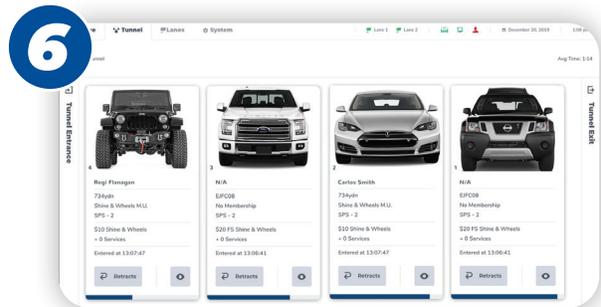

2 Camera photographs the front of the vehicles at the Pay Station.

5 The easy drag-and-drop feature allows attendants to reorder queue, send rollers or start/stop the conveyor.

3 Vehicle information is displayed to loading attendant. This includes colored image of the vehicle and the wash packages purchased.

6 Provides full tunnel insight. If an attendant misses a trailer hitch or damaged bumper, they can easily retract equipment before the vehicle reaches equipment.
