Positive Displacement Blower Packages

Performance Map

Performance based on inlet air at standard temperature of 68 °F, an ambient pressure of 14.7 psia and 36% relative humidity. For performance at non-standard conditions, contact your authorized AVI representative.

Dimensions

15HP system shown, actual cabinet dimensions vary based on package.

Vacuum IQ

Our positive displacement blower system features Vacuum IQ technology to maximize operational efficiency.

- Dynamic VFD dramatically reduces utility bills
- Operating expenses are minimized through longer service life and lower failure rates
- Intelligent controls allow for remote monitoring of equipment

Choose Your Blower Manufacturer
Choose from Gardner Denver or Tuthill Blowers

Single or twin units
depending on flow and redundancy specifications
