

Sonny's POS 20.2 – What's New!

*Our 20.2 release included maintenance of the platform and work on our Beta release of the Smart Motor Control Center along with the new features below.

POINT-OF-SALE FEATURES

Prepaid Washes

Selling Prepaid Washes (POS) – Customers now have the capability of selling prepaid washes from the point-of-sale (POS). Prepaid washes do not queue a wash, allowing for other items to be added to the transaction. At check out, a one-time use code is generated allowing customers to give their prepaid wash away or to use the purchase, at a later time.

Customers can purchase more than one prepaid wash and more than one prepaid wash type per transaction. Example: The cashier can add 2 Prepaid Basic Washes and 1 Prepaid Best Wash Unlimited.

QTY	SKU	ltem	Price	Total
1	5052	Basic Wash Prepaid	\$15.00	\$15.00
1	8	Good Wash Unlimited Plan	\$25.99	\$25.99
1	8	Good Wash Unlimited Plan	\$25.99	\$25.99

Note: The point of sale will only produce one code for multiple prepaid washes.

Ex: If **3 prepaid washes** are purchased in one transaction at the **point of sale**, only one barcode will be produced.

How to Add a Prepaid Wash to the Point of Sale
