

Sonny's Digital Queue

Manage your queue so customers receive correct services and retract equipment when needed.

Sonny's Digital Queue provides attendants the peace of mind knowing which vehicle to expect next, ensuring everyone receives the wash they purchased.

Speed and Accuracy of Service

Attendants receive images of vehicles in queue to identify if they are loading the correct vehicle onto the conveyor. Easy drag-and-drop feature allows manual reorder of the queue, send rollers, start/stop the conveyor, delete vehicles, and apply retracts before and after clearing the photo-eyes.

Save Equipment Retracts

If a vehicle with an after-market application or damaged bumper passes the gate simply retract the necessary equipment before it enters the tunnel. The system stores and recalls the retract for future visits.

Smart Digital Queue

Automatically reorders vehicles in the correct order without loader intervention. Ideal for sites with services before the tunnel that may cause cars to get out of sequence.

Specifications

Digital Queue Dimensions	68.5in L x 28in W
Camera Dimensions	7.2in L x 5.8in H

Digital Queue: Speed and Accuracy of Service

1

Customer purchases a service at Pay Station.

4

Attendants can acknowledge members or first-time visitors and greet customers by name.

2

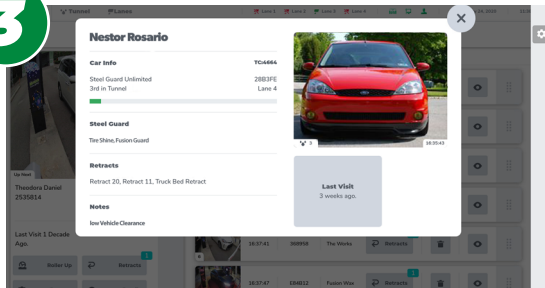

Camera photographs the front of the vehicles at the Pay Station.

5

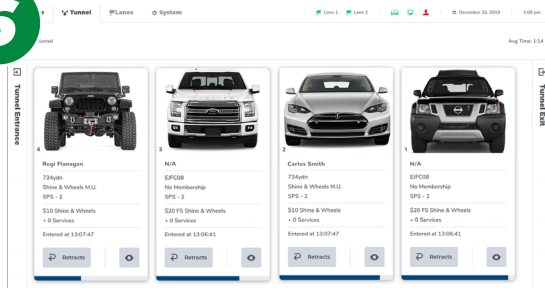

The easy drag-and-drop feature allows attendants to reorder queue, send rollers or start/stop the conveyor.

3

Vehicle information is displayed to loading attendant. This includes colored image of the vehicle and the wash packages purchased.

6

Provides full tunnel insight. If an attendant misses a trailer hitch or damaged bumper, they can easily retract equipment before the vehicle reaches equipment.

Now Integrates with Sonny's SmartSTOP Anticollision System. Allows attendants to view tunnel cameras, event logs, and pause, enable or disable SmartSTOP.

Requires SmartSTOP license. See product details on the next page.
