

# Stand-Alone PLC Functional Controllers

The Stand Alone PLC Functional Tunnel Controller can be added to any tunnel and integrated with all washes. Excellent for managing throughput and maintaining a consistent quality product with any tunnel configuration.

## Gate Controller

Controls multiple gates at sites where automated Pay Stations are used. Manage the flow of vehicles to avoid accidents and ensure the queue stays in order.

### Gate Controller Features:

- Time out to close gate
- Automatically queue cars in order
- Controls up to 3 gates
- 3 Configurable options: Gate specific settings, On-time to open the gate and Delay for wash in use signal
- Compatible with all wash in use signal types (active/passive)
- Gate status LED display
- Built-in alarm display functionality for troubleshooting
- Graphic User Interface to override outputs in manual mode and monitor input status

## Truck Bed Retract Controller

Sonar sensor technology with relays that identifies open and covered truck beds. Automatically retracts top brushes, turns off applicators, and activates dryer Gator Gates over open truck beds.

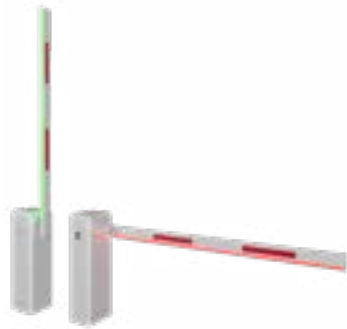

- Sonar profiling of vehicle detects open truck beds
- Save on chemistry and energy
- Control up to 16 functions
- Multi-color touch screen for easy programming
- Available with standard interface programming for WashPilot, DRB Systems, and ICS controllers.
