

Flowline™ AR30 Belt Conveyor Retrofit

The FlowLine AR30 Belt Conveyor Retrofit is designed to fit any existing belt conveyor pit, including AVW®, whether it's a new build or replacement for a current operating unit. This conveyor includes all of the industry leading design features that make FlowLine conveyors best-in-class, including dual 30 inch belts and galvanized structure. Designed for easy installation to reduce down-time, your operation will be up and running in just days.

Features

- Drop-in replacement conveyor featuring all of the FlowLine design advancements which has made it the industry standard.
- Bolt-together design has been modified to fit a narrower conveyor trench while using standard STI components for quick install and readily available replacement parts.
- Reduce maintenance with the FlowLine ExTrac System designed to eliminate dirt and contaminants to lengthen belt & sprocket life.
