

Flowline™ DB60 Detail Belt Conveyor

Sonny's FlowLine DB60 is a dual belt conveyor designed specifically for express detailing applications. With adjustable speeds, this conveyor is sure to maximize the productivity of any detailing operation. The dual belt design offers very easy maintenance access, and the reduction in belt width makes this an extremely practical and cost effective detailing belt option. This conveyor includes all of the industry leading design features and technology that make FlowLine conveyors the longest lasting, highest quality belt conveyor available today.

Features

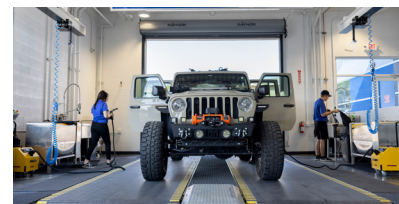

- Improve labor efficiency to detail more cars per man hour by controlling the pace of your express detailing service.
- Elevate customer satisfaction with a consistent detailing service delivered in a reasonable amount of time.
- Reduce maintenance, increase belt and sprocket life with our dual-belt design that delivers a full 12ft work space.

FlowLine™ DB60 Detail-Belt Conveyor

1 Dual 60in Belts

Ample space for work in and around the vehicle while being detailed with optimal spacing for maintenance access.

3 Motor Cover

The galvanized motor cover is only 2 1/2in high! This allows any vehicle to easily ride on the belt.

2 Overall Conveyor Width (same as single belt, 12' wide)

Overall width of 12' accommodates every vehicle while leaving ample space for staff to detail the vehicle.

4 Galvanized Framework

Every structural component of the FlowLine™ is hot dip galvanized to maximize longevity in the harshest environments.

The FlowLine Launch Belt Launch Your Profit Potential!

Customers drive their vehicle onto the Launch Belt. Once the vehicle is ready, the Launch Belt pushes the vehicle onto the Detailing-Belt conveyor.
