

Flowline™ WB30 Wash-Belt Conveyor

Sonny's FlowLine WB30 conveyor provides the edge you need to differentiate your brand from an engineering accomplishment that you'll never need to think about. Every detail has been reimagined to reduce wear, maintenance, and downtime. FlowLine maximizes throughput during your busiest peak hour.

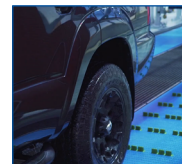

Features

- Self-cleaning low maintenance engineering marvel that delivers industry leading belt & sprocket life in the harshest environments.
- Elevate customer satisfaction with no correlator confusion that slows throughput and risks damage claims.
- Stand apart with an easy and smooth loading experience that creates a memorable competitive advantage in your market.

Specifications

	FlowLine™ SD STANDARD DUTY	FlowLine™ HD HEAVY DUTY

FlowLine™ WB30 Wash-Belt Conveyor

1 Drip Trays

Galvanized drip trays are installed underneath every ExTrac slot to ensure that the contaminants and dirt do not fall onto the bottom of the belt. Removing dirt and contaminants from the conveyor as quickly as possible is the key to maximizing the life of the consumables.

2 ExTrac™ System

The wear plates feature our ExTrac System, a series of slots cut in the plates that are designed to eliminate dirt and contaminants from the conveyor as quickly as possible. This is one of the design features which helps increase the lifetime of the belt, sprockets and wear plates.

3 Motor Cover

The galvanized motor cover is only 2 1/2in high! This allows you to put any production vehicle through your car wash.

4 Galvanized Framework

Every structural component of the FlowLine™ is hot dip galvanized to maximize longevity in the harshest environments.

		FlowLine™ 30-SD STANDARD DUTY Conveyor	FlowLine™ 30-HD HEAVY DUTY Conveyor
CONVEYOR		30in width	30in width
Up to 150ft*	Conveyor Base	\$62,400.00	\$64,900.00
	Per Foot	\$1,425.00	\$1,675.00

*Call for pricing on conveyors over 150ft

Includes:

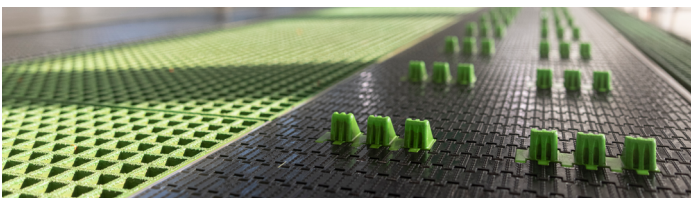

FlowLube Automatic
Bearing Lubrication

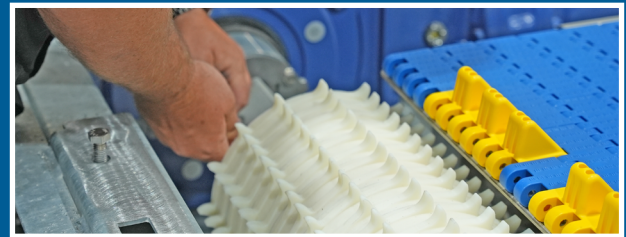

FireClamp kit to
simplify maintenance
